WRONGS TO CHILDREN.

Women and children have a right to protection, and not chivalry alone guards the former nor tenderness only fosters the latter. Justice and humanity should stir every man worthy of the name to vigilance in guarding these weaker vessels from

The paucity of schools which deprives thousands of children of the education to which they have a constitutional right is an outrageous wrong which it is hardly possible to anathematize too strongly. Now another evil which threatens these little ones is hardly less to be execrated.

A physician of standing, who is an Inpector of Public Schools, has declared that the sanitary condition of a primary school attended by nearly a thousand children is so bad as to seriously threaten the health of the scholars. The physician shows that the school surroundings are highly calculated to breed fever and malaria, since the loose earth in the unpaved yard and the miserable construction of the water closets are fruitful in miasmatic vapor.

What makes this scandalous neglect more inexcusable is that the attention of the school authorities was drawn to the state of things before the school was opened. To deprive children of education or to grant it at the cost of their health is not a very commendable condition of things in the school authorities.

A SAD HISTORY.

The wreck of a promising young man worthless woman is matter for pity. It is useless to rail at the infatuation which can thus sweep a man headiong to destruction. The passion of love is as irresistible, when it grasps its victim, as the swirling waters which hurl themselves over Niagara. The blasted career of Robert Ray

Hamilton has reached a melancholy conclusion in his death by drowning in Yellowstone Park. Youth, wealth, position, and a name as honored as any in the rollcall of New York's distinguished families, all were swamped through the Circean charms of a coarse adventuress who had dragged his reputation through the mire.

Even in his dealings with this infamous creature, Hamilton was not all forgetful of the bearing of a gentleman. While he is to be pitied, he is also to be blamed, Noblesse oblige. He should have conquered his passion no matter what it cost,

As it is, his career is a melancholy object-lesson that the way of the transgressor is hard, and his life preaches as eloquently as the wreck that rots upon some wavesweptledge. All that he possessed has only served to barb more keenly the arrow of disgrace which has laid him low. Honor is the highest attribute of the gentleman, and nothing can compensate for tts loss.

Pretty Miss Mabel Jenness has this to say asked to tell people 'just how to bow,' I always reply that I do not believe in teaching people to bow, but that I advise the practice of simple genufications, exercises which call into play and give freedom to the muscles used in a courtesy; for if the muscles are carefully trained in the technique of motion, and the heart is kindly, the bow will be gracious. Grace is physical freedom governed by 'a gracious attitude of heart. But when one becomes elf-conscious the movement is stereotyped, and lacks that delicate subtlety which is the outgrowth of kindliness.

An attempt has been made to do away entirely with the recementy of introduction, but it has proved too; there's no beer to be had, futile, for American men and women when brought together and left to themselves aupear awkward and hesitate to break the ice. In Enropean drawing-rooms every one speaks to every one else, and a gentleman may take down a lady to supper without, perhaps, even knowing her name. It is usual, however, to exchange cards and thus pave the way to future exchange of civilties. It is well to remark that it is a provincialism to introduce a newly arrived guest to every one in the room. This is no longer done except in small towns, and even there it is an unnecessary and awaward ceremony. It would be impossible for busiess of tasis should bring together only those whom she fancies would be congented to each other.

Times. A South Side Captain was talking the other day about the old times when he first joined the force and travelled a post out of the old Union street station on the West Side. One of his "yarns" related to the time when the city commenced the issue of warrants against the owners of dogs upon which no license had been paid. The instruments were commonly referred to as "dog warrants."

The commander of the Union street station handed a dog warrant to Officer "Jim" Libby one day, with instructions to serve it at once. "Jim" went to the house of the owner of the dog, and not being able to get satisfaction from the owner actually carried the dog away and locked it up in a cell at the station. Thus is probably the only case on record where a real, live dog was arrested and locked up in a police station on a warrant issued by a magistrate.

The Captain, who is responsible for the above, told another story about "Ike" Lansing, who was on the force many years ago. "Ike" was given to "soldiering" during the night, but his disposition was not an excention.
